

Self-taught full-stack developer and phone repair technician. I built and use FixLog daily to run my repair business, and I've built CircleNet — a social platform with live streaming and anonymous messaging — three times against a single backend.

EXPERIENCE

Phone Repair Technician · Self-employed

2015 — Present

Eswatini

- Run a phone repair business end to end — diagnosis, repair, sourcing parts, pricing and customer records.
 - Built FixLog, a React Native and Supabase app I use daily to track every job from intake to collection.
 - Handle hardware faults across iOS and Android, including screen, battery and charging port repairs.
-

PROJECTS

CircleNet

2024

A social platform with feeds, groups, anonymous messages and live streaming — built three separate times against the same Express + MySQL backend.

Next.js · React Native · Express · MySQL · WebSockets · Vanilla JS

FixLog

2026

A repair log for the phones I fix — devices, faults, parts and turnaround. I use it daily.

React Native · Expo · Supabase

SKILLS

Frontend

Next.js React React Native TypeScript Tailwind CSS

Backend

Node.js Express MySQL python Supabase WebSockets

Tooling

Git Expo Vercel
